Product Profile: HA23

HA23 is an innovative hyaluronic acid injection designed to provide long-lasting relief for knee osteoarthritis. With just a single dose, **HA23** helps restore lubrication in the joints, reduce pain, and improve mobility for up to six months. Backed by clinical studies, it has demonstrated significant improvements in pain reduction, daily function, and overall quality of life, while maintaining a strong safety profile. With its promise to help patients *“Move Better, Longer,”* **HA23** represents a breakthrough solution in joint care and osteoarthritis management.

Resource Person Profile

Dr. Juan Agustin Coruna

Dr. Juan Agustin D. Coruña IV, MD, FPOA, FPOFAS, FPCS is a board-certified orthopaedic surgeon with subspecialty training in foot, ankle, and wound care. He is a Fellow of the Philippine Orthopaedic Association, the Philippine Orthopaedic Foot & Ankle Society, and the Philippine College of Surgeons. Dr. Coruña completed fellowship training under distinguished international experts in South Korea and Japan. He currently serves as Chief of the Foot and Ankle Service at Corazon Locsin Montelibano Memorial Regional Hospital and as Chairman of the Department of Orthopedic Surgery & Wound Care at The Doctors' Hospital, Bacolod. Widely recognized as the pioneer foot and ankle surgeon in Western Visayas, he is also an international faculty and speaker in orthopaedic education. His distinctions include the JOA Congress Travel Award in Japan and leadership as Course Chairman of the first AO Trauma Foot & Ankle Seminar in the Philippines.
